The People, Place, and Space Reader includes both classic writings and contemporary research, connecting scholarship across disciplines, periods, and locations to make sense of the ways we shape and inhabit our world. Essays from the editors introduce the texts and outline key issues surrounding each topic. A companion website, People-PlaceSpace.org, provides additional reading lists covering a broad range of issues. An essential resource for students of urban studies, geography, design, sociology, and anyone with an interest in the environment, this volume presents the most dynamic and critical understanding of space and place available.
